Re: Intellectual Property Declared By Intermec

Dear Ms. Hutchinson:

As you know, EPCglobal, through its outside law firm, Dann Dorfman, has taken the position that the following issued patents, published patent application, and unpublished patent applications are not necessary to practice the Generation-2 standard:

U.S. Patent Number and Title

4739328: System for identifying particular objects
5030807: System for reading and writing data from and into remote tags
5777561: Method of grouping RF transponders
5828693: Spread spectrum frequency hopping reader system
5850181: Method of transporting radio frequency power to energize radio frequency identification transponders
5912632: Single chip RF tag oscillator circuit synchronized by base station modulation frequency.
5995019: Method of communicating with RF Transponders
6429775: Apparatus for transporting radio frequency power to energize radio frequency identification transponders
6288629: Method of using write--ok flag for radio frequency (RF) transponders (RF Tags)

Pending Published Patent Application

<u>U.S. Pub No.</u>	<u>Pub Date</u>	<u>File Date</u>
2003-0137400A1	10/056398	1/23/2002

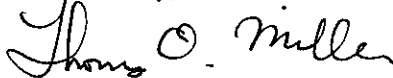

Pending Unpublished Patent Applications

<u>Ref No.</u>	<u>File Date</u>	<u>U.S. Serial No.</u>
203132	2/12/2004	10/779320
INT-CR-202-16	3/30/2004	10/814411
YO896-213R5	9/15/2003	10/662950

This finding relieves Intermec Technologies Corporation ("Intermec") of any obligation to grant licenses under that intellectual property and gives Intermec the right to set any terms and conditions it wishes if it chooses to license that intellectual property. As a result, Intermec is withdrawing its previous commitment to license this intellectual property and to do so on RAND terms. This withdrawal is effective immediately.

We encourage technology providers to contact us about opportunities to license the foregoing patents and patent applications, recognizing that Intermec is not required to grant any license and can establish any license terms and conditions it deems appropriate.

Sincerely,

Thomas O. Miller
President
